### **Professional Skill:**

- HTML5, CSS3, SASS, Modern JavaScript ES6, Webpack, Bable, ReactJs, VueJS, jQuery, Ajax, SOID Principle PHP, Object Orient Programming, REST API, Social API, third-party API, Payment Getaway API.
- The overall architecture of the framework. While Laravel is known to be presented to the public as a few times simpler versions of PHP, it's still a complicated framework. An experienced PHP developer has to perform a ton of complex tasks on a daily basis: routing, creating eloquent models,

middleware, developing blade templates, and views. Neither of these is possible without having an understanding of the architecture of the framework.

- Using Laravel features for edge-touching development. A well-trained Laravel developer knows how to use the framework features to create a Laravel project with a development package. A software engineer can think himself skilled if he has a working knowledge of Modular Packaging System; ways to reach both global and local databases; codes and expressive syntax.
- Unit Testing. Unit Testing is one of Laravel's most basic and functioning features. In a nutshell, unit testing allows developers to test code while writing new ones. Thanks to unit testing, the development process wins inaccuracy.
- WordPress Custom Post Type, Widget, Metabox, Action Hook, API, Shortcode, WooCommerce Plugin Action Hook, RESTful API. WordPress Customizer.
- Page Builder Add-ons Create (Elementor, Wpbakery).
- WordPress Option Frameworks: WordPress Customizer, Redux, Codestar.
- Laravel & VueJs.
- PSD To HTML Design 100% Pixel Perfect Design.
- MYSQL and SQL Database Management ORM Relationship.
- Version Controller GitHub & GitLab.
- Third Party API Integration With REST Full API & Web Services.
- PSD To WordPress Theme Development 100% Pixel Perfect Design.
- Frontend Frameworks: Bootstrap, Foundation, Material.
- Understanding of W3C Standards, Web Accessibility & Best Practice.
- Automated Image Optimization, Using Grunt & Minified JS and CSS, Which Reduced Page Load Times By Up To 30%
- One Page SEO.
- Knowledge Photoshop, SEO, C, C+, JAVA, SOLID OOP and MVC Design Patterns.
- Can quickly understand Business Requirements and then translate these into functional requirements. Having a passion for customer service & responding quickly to enquiries. Can manage multiple. Projects in a fast-paced, deadline-driven environment.
- Excellent English Writing and Communication Skills.
